Managing smaller/larger teams and increasing effectiveness and morale.

RECENT PROJECT EXPERIENCES

Sandoz
Munich, DE
2023 –

Architect

Responsible for evaluating all business requirements and coming up with solutions that provide an integrated approach. Align and manage several migration projects, especially the move to S/4HANA.

Sandoz
Munich, DE
2020 – 2023

Dashboarding solution (SMART² project)

Responsible for leading a team providing and pre-calculating data for a holistic reporting application network implemented with QlikSense Dashboards which engulfs desktop and mobile versions of every aspect of reporting needs.

Stada
Bad Vilbel, DE (remote)
2022 – 2025

Tax and ICP Tool

Improving the BI planning tool to allocate general costs according to the tax regulations and calculating the performance fee to be charged towards licensors. Using HANA views and AMDP codes to greatly increase performance of allocations. Improving the ICP tool to create chains for calculating intercompany prices.

GE
USA (remote)
2021 – 2021

BI Support BW/4HANA

Support of the existing BI solution and HANA migration tasks.

Palkeet
Helsinki, FI (remote)
2020 – 2020

BI Implementation BW/4HANA

Migration of an existing BI system to BW/4HANA. Rebuilding the entire data flow architecture with aDSOs and CompositeProviders.

Novartis
Munich, DE
2017 – 2019

Mobile reporting solution (Genie project)

Creating the necessary automated interfaces to transfer data from SAP BI to a native iOS application to display critical KPIs on any iOS mobile device.

Essity
Munich, DE
2018 – 2019

BI Implementation

Test Manager and backend developer for PerfectStore application used for scoring retail stores according to compliance and KPIs like shelf life, placement of products, etc.

PAST PROJECTS

Sandoz
Munich, DE
2017 – 2018

Top level reporting (Daily Sales project)

Created a BI application with QlikView frontend to display daily sales KPIs (both MTD actual data and linear/PY based calculated MTG) including variances in daily use by high-level executives.

Novartis
Basel, CH
2015 – 2016

MDM and Product Margin (NPMR project)

Creating a tool used by 100+ countries worldwide for entering and consolidating product margin data in SAP BI and Web Dynpro. Created a Master Data Management tool for maintaining hierarchies and attributes across several systems.

Novartis
Basel, CH
2014 – 2015

Global Group Reporting (GDWH project)

Migrating all consolidated financial reporting from single data warehouse systems of all Novartis divisions to a single group data warehouse system with all closing relevant consolidation tasks (division-specific and cross-divisional).

Sandoz
Munich, DE
2010 – 2014

Dashboarding (SMART MIND project)

Created Dashboards with BO Xcelsius with full financial scope, sourced from SAP BI. Data transfer to BO Instances with BO Crystal Reports and LiveOffice. Created BI-IP based application for Molecule Launch Planning and Tracking.
